Subject: Mid-Coast and CZARA timelines

Hi Jayne and Dave,

Alan and I went to the Mid-Coast TMDL sediment and temperature TWG meetings. Overall, we thought ODEQ did a very good job, the TWG discussions were good and tough, and that ODEQ is continuing in the right direction.

I just wanted to give you the heads up that I think it's very unlikely that ODEQ will have the Mid-Coast TMDL out for public draft by January 2013. Ryan indicated at the temperature TWG meeting that he thinks there'll have to be about 7 more meetings which puts at least the TMDL development out until March 2013. I think it's premature to talk now with ODEQ, but do think it would be important to talk with them about timelines in the next couple of months. They may have a better idea of when they'll be able to finish at that point.

One thing that might be good to follow up on before we talk with ODEQ is asking an attorney if there's anything that needs to be done given the sliding timelines for coming to agreement with NWEA on adjusting the timeline in the Settlement Agreement, if needed. The final Mid-Coast TMDL date isn't in the Settlement Agreement, but I think our action on approving OR's CNPCP is due on November 15, 2013.

So this is just an FYI to both of you.
